Please join local, state and national leaders of social and emotional learning as we celebrate and share the importance of implementing this work in schools in Washoe County, the state of Nevada, and across the nation. This intimate gathering of dedicated difference makers will highlight the importance of our children developing the fundamental skills for life effectiveness. Through social and emotional learning, we can teach our young people the skills needed to handle ourselves, our relationships, and our work, effectively and ethically.

Please join us in supporting this important work.
